

Saints of Death – Album Lyrics – Ascend To The Throne

2. Ascend To The Throne

Stand and fight or fall. x4

War drums of hades are pounding.

Awaken the creatures of hell.

Santa Muerte is waiting.

Killing with lack of regret.

Drop to your knees, Get ready to die.

Now we ascend to the throne.

Pray to your gods, the nations will fall.

Now we ascend to the throne.

Riders in black, devour the land.

Now we ascend to the throne.

Drop to your knees, get ready to die.

Now we ascend to the throne.

Running and hiding in terror.

Screaming and begging to live.

Rivers will run red with your blood.

We will bring death to the land.

Drop to your knees, Get ready to die.

Now we ascend to the throne.

Pray to your gods, the nations will fall.

Now we ascend to the throne.

Riders in black, devour the land.

Now we ascend to the throne.

Drop to your knees, get ready to die.

Now we ascend to the throne

Stand and fight or fall. x4

3. Watching Me Die

Suicidal, nailed to the cross. I'm embedded with everything I've lost.
Waste away in a wages of sin, here they come, those feelings again

I can not die I try and I try. Feelings inside me consuming my mind.
Wasting away in my wages of sin. Don't try and stop me, i'll do it again.

Watching me die x3

Genocidal, humanities loss. We kill each other, no matter the cost.
We kill each other in Gods holy name. Don't ya think that it's fuckin' Insane

They will not die, we try and we try. Killing them softly inside of our minds.
Wasting away, in the wages of sin. Don't try and stop them, they'll do it again.

Watching them die x3

Ecocidal, humanities loss. Kill mother nature, no matter the cost.
We rape and drill in progresses name. Don't you think that it's fuckin' insane.

She will not die. We try & we try. Fucking her soul like a whore in the night.
Wasting away in wages of sin. Don't try and stop us, we'll do it again.

Watching Her Die x3

Watching them Die x 2

Watching us die x2

4. God Can't Help You

Forged in fire, born out of the blaze.
Industrial wasteland, can't stop the brigade.
Sentinels are rising, hammer of the gods.
Humanitary breakdown, soon all hope is lost.

For all the wars you wage in the name of peace, God can't help you now.
For all the lies you breathe and the hate you breed, GOD CAN'T HELP YOU NOW.

Born a liar. Born into the game.
Educated hatred, Regressed and refrained.
Unrelenting Hunger, Desires never fill.
Promissory payback, avarice of the Gods.

For all the wars you wage in the name of peace, God can't help you now.
For all the lies you breathe and the hate you breed, GOD CAN'T HELP YOU NOW.

Born in fire, evolved from the flames. Radiated wasteland, can't stop the insane.
Scientific warnings, Pollution & Massive Debt.
Killing all for Progress, no one gives a fuck.

For all the wars you wage in the name of peace, God can't help you now.
For all the lies you breathe and the hate you breed, GOD CAN'T HELP YOU NOW.

5. Repentance

Is this the end of my life, or is this the strangest of dreams?

The darkness consuming my mind. Someone, told Me, to lie down,
as I speak my demise. The Nightmares consuming my dreams.
Confusing the conscious with lies, again.

All that i thought was unreal, still thinking that this is a dream.

I scream at the top of my lungs. No one, hears me scream,
As i'm dying inside. The Sorrow and sickness I feel.
Confusing that conscious with lies, again.

Everything I thought was true.

See the world through shattered eyes.
All the things I've said and done.
REPENTANCE.

The mind is a strange thing to lose. Not knowing what I'm going to do.

Despondent one day at a time. Anxious. Empty, inside.
As I'm losing my soul. The thoughts that run thru my mind.
Confusing the conscious with lies, again.

Everything I say and do.

Nothing works it all falls through.
Feel the rage that builds inside.
REPENTANCE.

Stuck inside this rubber room, these four walls become my tomb.

Everyday it slips away, my consciousness i can't regain.
I've become my only friend, look inside my black tooth grin.
Left alone inside my mind, you will never see my demise.

All of the feelings inside.

All of the hate that i find.
No one can save me this time.

Doctor says I'm doing well, but every day's a living hell.

Days that i don't leave my bed, for fear of thoughts inside my head.
Waste away in side my mind, will I make it through this time.
Welcome to my world I live, only death can end all my pain.

All of the feelings inside.

All of the hate that i find.
No one can save me this time.

Everything we thought was true.

See the world that we've construed.
All the things we've said and done.
REPENTANCE.

6. You Can't Run

Out in the darkness, there's nothing to see.
There's no one around us, it's just you and me.
The shadows are falling into the night.
Your screaming in terror, and running in fright.
I'm watching you closely, Adrenaline pounds.
Stalking my victim, I'm hunting you down.
Awaiting my moment, I'm ready to strike.
Out of the darkness, into the light.

You can run, but you can't hide. You can run, Now you're gonna die.
You can run, but you can't hide. Screaming in terror, running to live.

Our heartbeats are pounding, the thrill of the chase.
I'm closing behind you, now quicken the pace.
And so it begins, the hunter, the prey.
There is no escape, you won't get away.
Out in the distance, a light up ahead.
You enter the cabin, with feelings of dread.
There's death in the air, but no ones around.
You hide basement, not making a sound.

You can run, but you can't hide. You can run, Now you're gonna die.
You can run, but you can't hide. Screaming in terror, praying to live.
You can run, but you can't hide. You can run, Now you're gonna die.
You can run, but you can't hide. Clawing, fighting, this is your death.

WELCOME TO MY SLAUGHTER HOUSE

I am the monster, that feeds on your fear.
I am a sick mother fucker, cut the flesh from your bones.
Scream for some mercy, as I sharpen the blade.
Sacrificing your life, so my family can live.

Tied to the table, you beg and you plead.
There is no one to save you, now you're starting to bleed.
The pain and the sorrow, seeming never to end.
I'm going to cut your heart out as i'm watching you die.

7. Soldiers of Metal

We are the soldiers of Metal, raised on that hard rockin' sound.
MotorHead, Priest & Black Sabbath, making our heads start to bang.
We are society's outcast, misfits, not part of the norm.
Brothers and sisters of metal, flying our banner so free.

Soldiers of metal, we're sounding the charge.
Soldiers of metal, you answer the call.
No time for who's best, No time for discord.
Soldiers of metal, we never shall fall.

It doesn't matter the genre, Groove metal, Glam or Hardcore.
The purists will scream, it's not metal. Fuck them who cares what they say.
United we all stand together, divided we all fight alone.
We are the soldiers of Metal, together we'll conquer the world...

Soldiers of metal, we're sounding the charge.
Soldiers of metal, you answer the call.
No time for who's best, No time for discord.
Soldiers of Metal, we never shall fall.

Scream and shout. Let your demons out.
They can't stop us now, we're Soldiers of Metal.

Live for today. Sacrifices made. The price we pay.
We're Soldiers of Metal.

We're strong as steel. Stand tall & proud.
The world shall kneel, to Soldiers of Metal.

Soldiers of metal, we're sounding the charge.
Soldiers of metal, you answer the call.
No time for who's best, No time for discord.
Soldiers of metal, we never shall fall.

We will rule the world together forever. x 4
