

Album Lyrics - Lycanthro - Mark of the Wolf - 2021

Crucible

The streets are lined in blazing red
The skies are hung in black
Kill the unholy messengers
They're never coming back
Bringers of evil
Worship the macabre
Tie them to their posts
Any they sing the devils song

Evil woman
Deadly nights
To those worshipping the sky
Evil Woman
Read the last rites
To watch and hear their evil cries

Melting pot, final test
Human, possessed
Cast the hex, witchcraft
Gathered, in mass
Suck the light, from my eyes
Demon, in disguise
Fair is fowl, fowl is fair
Smoke will rise
Through the air

Stirring the cauldron
Howling at the moon
Dancing at midnight
See the shadows swoon
Taken prisoner
Corrupt arm of the law
Judge, jury, executioner
Send these demons gone

Hear the bell toll
Deep in your soul
Witching hour is here
Kill the sinners
Death from within her, let our souls be clear

Fallen Angels Prayer

I need to find an angel
To take me from this place
They say I must repent
From my sinful ways
Trapped inside these walls
Since the day that I was born
And through the whispers of these dirty streets
I hear your weeping scorn

Singing praises through these walls
I see her walking through the candlelit hall
I hear the anguished cries as the night falls
I hear prayers from fallen angels
And they won't be ignored

A symphony of outcasts
Crying out in pain
They told me they were evil
They spoke their name in shame
Living in servitude
I'll be your slave no more
I will be their guardian angel they won't be ignored

You wiped the blood off my face
You wiped away all my shame and disgrace
I'm a creature in their eyes
The thing they hate, the thing they despise
I swear to you that they won't take you
They won't break you
They won't seal your fate

Sanctuary, Sanctuary

You will not take her
Be damned forever
I can't live without you
I will die
By your side

Enchantress

She came out from the shadows
Shining bright like heavens light
Descending from a crack in the sky
She'll wrap herself tightly around you
She'll never let you go
Ready to drag you down
Down to the pits of hell

Like an angel in the night
Giving off an unholy light
And the shadows rising up to the sky

(Enchantress) her blood red eyes
(Enchantress) she will be your demise
(Enchantress) perception defies
all reality
please come to me
I am mesmerized
By her unholy rhapsody

She came right towards me
Her eyes shining bright
The eyes of hope
The eyes of telling lies
Dark veil surrounds me
As I feel her warm embrace
If you're a witch
Then I'm a demon

There she lies right in front of me
Make me think what I've become
I see the hope
In her hungry eyes
Sucking on all my dreams

Mark of the Wolf

You have joined us here tonight
By the dark howling call
Join in our unknown circle
Of everlasting life
Down in our under forge
Where the light meets the stone
Join in our unknown order
Of lycanthropy

I feel alive at midnight
Unholy release
When you see my hypnotic gaze
Existence will cease

Sign of the creatures of the night
Burned deep in our hands
Join in eternal brotherhood
Do you wear the mark?
Mark of the wolf

(Drink) from our chalice
(Become) one of us
feel the beast flow through you
(Trapped) where there's no light
(Lost) in the dead of night
my bloodlust starts to arise
I'm the silver hands demise

In Metal We Trust

Born in the dark country
Home of the working man
Made of metal and steel
Working tooth and nail and bone
Dark warriors arose
Born on the Sabbath day
On the stage they forged a beast
They we all can call our own

Over the years it has grown
You won't ever have to be alone, anymore
A brotherhood of steel
A family where you can feel, at home

Storming the stage
With leather, spikes and chains and fire
See the smoke growing higher
The armies marched
With devil horns in the air
Defend the faith, well do what we must
Cause in metal we trust

The Gods of metal came
We all knew their names
In our hearts, and souls
And our spirits made of steel
The crowd starts to roar
They're all screaming for more
On the stage they forged a beast
They we all can call our own

In metal (in metal)
We trust (we trust)
Defend the faith
In metal we trust

Into Oblivion

We're breaking these chains
In a world where little remains
And all those innocent lives
Hoping to survive the night
The living dead are among us
They're everywhere
On the broken, battered streets
Inside your head

Corroding your mind with fear and dread
They plant their seeds in your head
Now you are marching with the armies of the dead
Into oblivion

Ride the Dragon

Welcome to our world of fantasy
Everything is real, and everything can be
Makes you stop and wonder
What's happening to me?
We'll ride into the mists of eternity

Ride with the dragon
Hear his scream and roar
Ride with the dragon
Till the night sings, forevermore

Raise your voice
Shout high into the air
Release the power
That no one else can bare
Our legions marching on and on
We're leading the fight
Ride the dragon
Into the night

Evangelion

In a distant time
Where the light barely cracks the sky
Lies humanity
Underneath an ever-watching eye
And deep underground
Lies a force they wish they never found
Carries the cycle
Of death and rebirth

You are the chosen one
You are the one who will save humanity
You are the one who will break the shackles
Of our pain

Evangelion
Save me from this worlds descent
Evangelion
Save me from my minds despair

A cruel angel rises before you
Into the chapel of your memories
United as one, eternally
Oh, please save us
From inhumanity
