

ASHES OF THE SUN    GODS WITH MACHINES    LYRIC SHEET

1. SOPHISTICATED CLOWNS

Dark shadows take their place  
Remember yesterday  
Over and over again they ignore your complaints  
Freedom as a slave

Sophisticated clowns  
Drive us forward

Break it all down and rebuild again  
The leaders are not our friends  
Throw us into fire this is the end  
We'll burn for all your sins

Sophisticated clowns  
Drive us forward  
Journey to the clouds  
They push us backwards

I walk along the road  
When it occurred to me  
These people can't be trusted  
But what are we to do  
But wait impatiently  
As they burn down our city  
It's time to take a stand  
Stand up for what is right  
The pressure has been building  
You won't be alone

They're waiting there with you  
Take a leap start commanding  
Commanding  
Start Commanding  
Start Commanding  
Start Commanding

Your people will stand with you and they will fight  
You know who they are  
No longer will they take control of our lives  
Time to heal the scars

Sophisticated clowns  
They're losing control

## 2. SAVE THE WORLD

She came from the sky  
I did not know  
That I could ever feel so alive  
Please I think I made it show  
The evils of the world below  
Reaching to the horizon  
To get an answer from the sun  
It came from the world  
Down below  
The evil summons me to

Go save the world  
Return the girl  
Break their curse  
Begin the purge

They call me home but

I will not go  
The darkness digs into my souls  
I can't escape from  
The hallow  
Emptiness is all I know  
She calls me out of the shadows  
But I will fight against her pull  
Please I think I  
Need to go  
Or I'll be taken by the

Ghosts  
In the dark  
Become the spark  
Free your mind  
Destroy their shrine  
Save the world  
Return the girl  
Break their curse curse  
Begin the purge

Return the girl and save the world  
Return the girl and save the world

### 3. FORCED TO KILL

Loyal to the cause  
It's all a fraud  
Lied to by demons  
And god  
How could they do this  
I thought they cared  
They left me helpless  
And scared

Soon you will find  
Peace of mind  
Stare into  
the demons eyes  
Show me the way  
To the blackened sky  
Protect world stay alive

Confusion sets in  
I'm now at large  
Loss of memory  
Something's wrong  
You broke my people  
You stole their pride  
But now we see through  
Your lies

Soon you will find  
Peace of mind  
Stare into  
the demons eyes  
Show me the way  
To the blackened sky  
Protect world stay alive

The walls start caving in  
As I am revealed  
Escape is not an option  
So I'm forced to kill  
One by one  
I'll break you down  
To level the field  
Try to stop me

There's no way out  
I'll see you in hell

Soon you will find  
Peace of mind  
Stare into  
the demons eyes  
Show me the way  
To the blackened sky  
Protect world stay alive  
Reality it isn't real  
Look deep inside  
What do you feel  
Dark energy  
Flows through your bones  
Blackens your heart  
Corrupts your soul

#### 4. THE ELEPHANT

Sometimes when I stare into the night  
I wonder if I will see you again  
It feels like everywhere I turn  
I'm reminded of the time when we were friends

So long  
I've waited for your return  
So long  
I've hated every twist and turn  
So long  
What ya did to me, to my family  
So long  
Your the enemy but now I'm free

Drifting deep into the unknown  
I came across a fragmented well of lies  
Scared of what I thought I might find  
I scattered it through all of space and time

So long  
I've waited for your return  
So long  
I've hated every twist and turn  
So long  
What ya did to me, to my family  
So long  
Your the enemy but now I'm free

Darkness holds on to your mind  
Blinding you from what you have inside  
It can't control and it can't contain you  
Your a creature of the world that's in your mind

So long  
I've waited for your return  
So long  
I've hated every twist and turn  
So long  
What ya did to me, to my family  
So long  
Your the enemy but now I'm free

## 5. A NEW WAY TO DIE

Cells shift inside my head  
I am not dead  
I have to try again

Consciousness seems to hurt  
Become a blur  
Going interstellar

I witnessed you run away  
You tried to save me today  
This time I will not try  
I found a new way to die

Pick up the pieces again  
You were my friend  
You tried I understand

I witnessed you run away  
You tried to save me today  
This time I will not try  
I found a new way to die

Every time I go my own way  
It comes down like a hurricane  
It's a suicide mission and I won't lie  
Feels like hammers on my brain  
Makes me feel like I'm sideways  
The time is now  
Don't change my mind

Trip down inside the lair  
I am not scared  
Im running out of air

I witnessed you run away  
You tried to save me today  
This time I will not try  
I found a new way to die

Every time I go my own way  
It comes down like a hurricane  
It's a suicide mission and I won't lie  
Feels like hammers on my brain  
Makes me feel like I'm sideways  
The time is now  
Don't change my mind

## 6. GODS WITH MACHINES

Fate brings us together  
It may be tough but it's forever  
Rain falls down from heaven  
The place is real can you imagine

Evil comes from darkened lands  
To reign on earth again  
It may be true but we believe  
There is no prophecy  
The Holy Ghost is but a lie  
We've seen it with our eyes  
Descend on us from up above  
Fire in the sky

Faith is fading fast  
In these darkest days  
If he is really up there  
Then why does he make us slaves

Evil comes from darkened lands  
To reign on earth again  
It may be true but we believe  
There is no prophecy

The Holy Ghost is but a lie  
We've seen it with our eyes  
Descend on us from up above  
Fire in the sky

Deep in the cosmos  
Creatures with machines  
Pretend to be gods  
Nightmares from our dreams  
Harvesting the earth  
Plotting evil plans  
Nature can't give birth  
To these unnatural man

Fate brings us together  
It may be tough but it's forever  
Rains falls down from heaven  
The place is real can you imagine

## 7. THE LOST ONES

Stay away, you're like a cancer  
Infecting everything you touch  
Get too close, I'll give you the answer  
You think you have me in your clutch

Poison, you're the infection  
Destroying, full of deception  
You can't bring us down

Tear it apart and build again  
Let go of fear that dictates you  
Too late now, we see all your dreams  
Bring the pain until you subdue

Poison, you're the infection  
Destroying, full of deception  
You can't bring us down  
Eroding, that body's finite  
Decomposing, It's the end of die zeit  
Time to pass the crown

Retreat to the lost ones  
Before we come  
You seek their wisdom  
Their sacred kingdom  
Sometimes they answer  
Sometimes they're cold  
Cure for the cancer  
That you behold

Running scared, the troops are fading  
They lack the will to carry on  
Nowhere to prove can't keep evading  
This time they know that we have won  
Corruption, is what we know  
Destruction, reap what ya sow  
The future has no light

Repercussion, from the undertow  
We are the anthropos  
Rebuild a new life

## 8. WE ARE HERE TO STAY

Staring at the stars I drift away  
Close your eyes  
These feelings, they will not change

Cold inside  
Every time I leave you feel this way  
It always hurts, that's not gonna change

You are not alone

Don't be afraid of yesterday  
You're stronger now and you are on your way  
Stand in your place and let them say  
We're stronger now, we are here to stay

Hold strong, I feel your pain today  
Cold inside  
I want to go but I can not stray  
Close your eyes  
We're so close to ending all our pain  
Another day and we will be free  
Be the change

You are not alone

Don't be afraid of yesterday  
You're stronger now and you are on your way

Stand in your place and let them say  
We're stronger now, we are here to stay  
Don't be afraid of yesterday  
You're stronger now and you are on your way  
Stand in your place and let them say  
We're stronger now, we are here to stay

You are not alone

Don't be afraid of yesterday

You're stronger now and you are on your way  
Stand in your place and let them say  
We're stronger now, we are here to stay  
Don't be afraid of yesterday  
You're stronger now and you are on your way  
Stand in your place and let them say  
We're stronger now  
We are here to stay  
We are here to stay  
We are here to stay  
We are here to stay  
We are here to stay

## 9. THEY BLEED JUST LIKE YOU

Get out, right now, we have just a few minutes  
Find a way out, we push them to the limit  
Forlorn mission, expect not to return  
Opposition, is none of your concern

The charred pathway, lead us to the slain  
We're born from pain, uncharted domain  
We don't need help, ambush from every angle  
Feel our blood flow, sacrifice down the mantle

Try to reach out, her life is strained to nothing  
Fake gods broken, we know their souls are rotting

The charred pathway, lead us to the sway  
We're born from pain, uncharted domain

Take the knife, shove it deep inside  
They bleed just like you  
Watch them beg and cry for their lives

The future of the new

They scatter away just like rats  
The false gods from the sky  
Look in their eyes as they weep  
They're the same as you and I

The charred pathway, lead us to the slain  
We're born from pain, uncharted domain  
Charred pathway, lead us to the slain  
We're born from pain, uncharted domain
