

05 - He Commands the Sun and Stars

Standing

The idol on the mountain

In his hands

A lightning bolt is held within each fist

And thunder at his wrists

Man of mortal magic in the sky

Legend

He commands the sun and stars

So perfect in control

They say

Trapped up there alone

Without an answer

Doing all that he can

With no where else to go

Seen as if a god

And held for ransom

For the wisdom of man

While the crowds demand to know

Problems

Problems with the weather

Tell us now

Tell us what creates the sun and rain

The winds and hurricanes

We won't let you down until you say

Lighting

Fire to the mountainside

At the top he'll live or die

On this day

Trapped up there alone

Without an answer

Doing all that he can

With no where else to go

Seen as if a god

And held for ransom

For the wisdom of man
While the crowds demand to know

Seen as if a god
And held for ransom
Doing all that he can
Having no where else to go

04 - Breathe

Take a moment to recharge
'Cause I don't think I can run anymore
No way
Been up and down there's nowhere left to go
But deeper

If I could breathe just long enough
Just to loosen up
All the knots in my head
And see the view from up above
What I'm dreaming of
When I'm sleeping in bed
Is waking up these parts of me
Come to life and set me free
The devil in distraction takes his/its toll
Balancing on fragile ground
That blocks the road
Like an overcrowded rat race in my soul

Breathe in, Slow down
Breathe til the heart slows down
Breathe in, Slow down
Breathe until the heart slows
Breathe in, Slow down
Breathe til the sun goes/comes down
Breathe in, Slow down
Yeah

Well don't you think it's funny how
Time keeps running out
Time after time
And it doesn't matter what amount
Cause I can't take account
If your time were mine
I'd still find another way to use it all
And the devil in distraction takes his toll
Balancing on fragile ground

We lose control
To/Of the overcrowded rat race in my soul

Breathe in, Slow down
Breathe til the heart slows down
Breathe in, Slow down
Breathe until the heart slows
Breathe in, Slow down
Breathe til the sun comes/goes down
Breathe in, Slow down
Yeah

07 Double Dip

Stacking up in my Tetris game
Reaching the breaking point
This collection that I've started now
Looking more like a hoard

Little girl oh my darling
Leave this wreck behind
You can find a world that is pure and true

Double dip on the chip in my mouth
Has now become the weight on my shoulders
Lick my lips and get ready for more because "no" was not a choice
Feeling down and drowned out
So tied down
Baby you know it's true
Careful what you wish now
'Cause it's taking over you

Thought I'd be happy serving two masters
But it's proved not be true
As my tower of love comes crumbling to the ground

Coming to senses with all my demons
Bit off more than I can chew
It's a heartbreak that I don't want to know

Little man left with nothing
Take all this to heart
You can build a new disillusioned start

Double dip on the chip in my mouth
Has now become the weight on my shoulders
Lick my lips and get ready for more because "no" was not a choice
Feeling down and drowned out
So tied down
Baby you know it's true
Careful what you wish now

'Cause it's taking over you

Feeling down and drowned out

Aren't you burnt out

Baby you know it's true

Careful what you wish now

'Cause it's taking over you

OVERWHELMED

Just a moment of silence
Is the rarest commodity

Purely passion to play
Not a glimpse of insane
Not a hint of the strain

Know it soon will be broken
The impending monstrosity

Yeah it hangs overhead
While the voices instead
Ask me why I even try

Guess I'll stay for a while
And get lost as I go

Getting nowhere
Piles of tension swarm to drown me
Tension it swarms in to drown me
Grasping every moment prized
Peace has turned to panic and I lose control
Desensitized and overwhelmed

Just a hint it's not to last
Both the high and low will pass
Just when I thought I'd slow the pace
Then the sirens blaze in to start the race

So I stay for a while
Getting lost as I go some more
Desensitized and overwhelmed
Yes I stay for a while
Getting lost as I go some more
Desensitized and overwhelmed

06 — Feels Like I'm a Ghost

The storm winds are raging hard tonight
Stillness of exhaustion fill my lonely eyes
Minutes and hours drifting by
I think of my queen inside
Lit up in candlelight

With a heavy heart I beg the sky
Sacrificing/I've sacrificed everything to win this fight
Years of our lives are drifting by
Magic stranger at my side
Take me to my love

And then I hear her voice at home
Calling out to the heavens
When I'm lost around the world
As she waits for me by the door
Wondering who it was before
Sometimes it feels like I'm a ghost

The storm winds are raging hard tonight
She could cast a spell upon this lonely sight
Branches in the window drifting by
Sipping the potion she's devised
Wondering where am I

And then I hear her voice at home
Calling out to the heavens
When I'm lost around the world
As she waits for me by the door
Wondering who it was before
Sometimes it feels like I'm a ghost

I can hear her voice at home

02 LIVE THE NEW TODAY

Here I am
Looking at reflections in the mirror
Living the way I've been primed

Cuts and frames
Hidden in projections as it flickers
Won't pass the test I'm assigned

Losing tact it slides
Want to know the God's honest story
Of the new life inside

I think it's time we have a deeper look now
At what's dead and gone
Free to carry on (And we'll carry on)
Standing in our strength
And doing what it takes (what it takes)
To live the new today

Looking back
Would we have different conversations
If the truth could really be said
Would you change
If it might bring you to your sorrow
For a chance at authentic life

Would you need to hide
Still behind the blame and protection
That has locked you inside

Take a look now
At what's dead and gone
Free to carry on (and we'll carry on)
Standing in our strength
And doing what it takes (what it takes)
To live the new today

I think it's time we have a deeper look now
At what's dead and gone
Free to carry on (And we'll carry on)
Standing in our strength
And doing what it takes (what it takes)
To live the new today
Free to carry on (And we'll carry on)
Standing in our strength
To live the new today

03 - War of Emotions

War of emotions
Psycho-distortion - LIES
The truth and delusion getting blurred
Write the words and fight

This is a different conversation
One with yourself you refuse to have (refuse the math)
10,000 men could not reap what you've sown
Evidence of incrimination
Spewing from every corner now (just look around)
The life that I've promised myself is worth a joke

Little child inside
Love is light and light is real
Doors will open you'll shine the way
Look at the truth and you will rise

War of emotions
Mental extortion - NO
The truth and delusion getting blurred
This is worth the fight

This is a different conversation
One with yourself you refuse to have (refuse the math)
Look at the people relying on you
Can you imagine your reflection
In all the faces you're looking at (make you mad)
Knowing this war that I'm fighting is with myself

End of the Tunnel

What a place for a spiritual overhaul
The darkness has brought me through it all
The dim light at the end of the tunnel
Is getting brighter
Closer now
Let it come

I can see
A life of riches calling me
It's just around this final turn (End of the tunnel)
Flying free
The way that I was meant to be
With all the lessons I have learned (End of the tunnel)
While I promise to never make
The same mistakes again
There's something greater that I take
I'm stronger than ever before
And nothing could replace what's happened here

We've reached the end of the tunnel
Through all of the strain and all the struggle

Turns out that we're stronger than what we know
It seems I've achieved the impossible
Hindsight leaves a different impression
It's getting clearer
Nearer now
Look in the mirror
With older eyes
What appears to be obvious now
Was once a miracle

I can see
A life of riches calling me
It's just around this final turn (End of the tunnel)
Flying free
The way that I was meant to be

And all the lessons I have learned

I've reached the end of the tunnel

Looking onward

Look at me now

From a past life

We've reached the end of the tunnel

Yeah and it was worth all of the trouble

We've reached the end of the tunnel
